The Board of Trustees
City of Dearborn Heights Police and Fire Retirement System
Dearborn Heights, Michigan

Dear Board Members:

The results of the July 1, 2014 annual actuarial valuation of the City of Dearborn Heights Police and Fire Retirement System are presented in this report. The purpose of the valuation was to measure the System's funding progress, provide actuarial information in connection with applicable Governmental Accounting Standards Board Statements and to determine the employer contribution for the 2014-2015 fiscal year. This report should not be relied upon for any other purpose. This report may be distributed to parties other than the Retirement System only in its entirety and only with the permission of the System.

The valuation was based upon information, furnished by the City, concerning Retirement System benefits, financial transactions, and individual members, terminated members, retirees and beneficiaries. Data was checked for internal and year to year consistency, but was not otherwise audited, by us. As a result, we are unable to assume responsibility for the accuracy or completeness of the data provided.

Future actuarial measurements may differ significantly from those presented in this report due to such factors as experience differing from that anticipated by actuarial assumptions, changes in plan provisions, actuarial assumptions/methods or applicable law. Due to the limited scope of this assignment, we did not perform an analysis of the potential range of future measurements.

To the best of our knowledge, this report is complete and accurate and the valuation was conducted in accordance with standards of practice prescribed by the Actuarial Standards Board and in compliance with the applicable state statutes. Mark Buis and Francois Pieterse are independent of the plan sponsor and are Members of the American Academy of Actuaries (MAAA) who meet the Qualification Standards of the American Academy of Actuaries to render the actuarial opinions contained herein. It is our opinion that the actuarial assumptions used for the valuation produce results which are reasonable.

Respectfully submitted,

Mark Buis, FSA, MAAA

Francois Pieterse, ASA, MAAA

MB/FP:mrb

2035

SECTION A
VALUATION RESULTS

FUNDING OBJECTIVE

The funding objective of the Retirement System is to establish and receive contributions, expressed as level percents of active member payroll, that will accumulate assets during each member's working years which, together with investment income, will be sufficient to pay promised benefits after retirement.

EMPLOYER CONTRIBUTION

The Retirement System is supported by member contributions, City contributions and investment income from Retirement System assets.

Employer Contribution which satisfy the funding objective are determined by the annual actuarial valuation and are sufficient to:

- (1) Cover the actuarial present value of benefits allocated to the current year by the actuarial cost method described in Section C (the normal cost); and
- (2) Finance over a period of future years the actuarial present value of benefits not covered by valuation assets and anticipated future normal costs (the unfunded actuarial accrued liability).

Computed employer contribution for the fiscal year beginning July 1, 2014 are shown on page A-2.

**COMPUTED CONTRIBUTIONS FOR THE
FISCAL YEAR BEGINNING JULY 1, 2014**

Contributions	Fiscal Year Beginning July 1,	
	2013	2014
Number Active ⁽¹⁾	66	74
Payroll	\$5,668,970	\$6,016,818
Projected Payroll	5,867,384	6,227,407
Total Normal Cost Rate	17.40 %	17.46 %
Employee Contribution Rate	4.93 %	4.93 %
Net Employer Normal Cost Rate	12.47 %	12.53 %
Employer Normal Cost (Dollars)	\$ 731,663	\$ 780,294
Amortization Payment ⁽²⁾	1,853,507	2,042,589
Net City Contribution	\$2,585,170	\$2,822,883
Estimated Percent of Pay Contribution	44.06 %	45.33 %

⁽¹⁾ Data as of one year prior to the valuation date. Pay and service data used in the valuation were “rolled forward” one year with assumed pay increases of 3.5% and one year of service accrual. Estimated payroll shown above includes only active members who have not applied for DROP.

⁽²⁾ Amortization payment based on a 21-year amortization of Unfunded Accrued Liability as of July 1, 2014 and 22-year amortization of the Unfunded Accrued Liability as of July 1, 2013.

**PRESENT VALUE OF FUTURE BENEFITS AND ACCRUED LIABILITY
AS OF JULY 1, 2014**

	June 30,	
	2013	2014
A. Accrued Liability		
1. For retirees and beneficiaries (including supplemental)*	\$ 143,482,311	\$ 147,219,367
2. For vested terminated members	175,121	187,584
3. For present active members		
a. Value of expected future benefit payments	36,279,324	40,097,443
b. Value of future normal costs	9,373,588	9,476,970
c. Active member accrued liability: (a) - (b)	26,905,736	30,620,473
4. Total accrued liability	170,563,168	178,027,424
B. Present Assets (Funding Value)	141,640,217	147,161,177
C. Unfunded Accrued Liability: (A.4) - (B)	28,922,951	30,866,247
D. Funding Ratio: (B) / (A.4)	83.0%	82.7%

* *Accrued Liability for retirees and beneficiaries includes all DROP balances and liability for current DROP members.*

DERIVATION OF ACTUARIAL GAIN (LOSS) FOR THE YEAR ENDING JUNE 30, 2014

The actuarial gains or losses realized in the operation of the Retirement System provide an experience test. Gains and losses are expected to cancel each other over a period of years (in the absence of double-digit inflation) and sizable year to year fluctuations are common.

(1) UAL* at start of year	\$ 28,922,951
(2) Employer normal cost	776,558
(3) Actual employer contributions	2,368,863
(4) Interest accrual	1,968,876
(5) Expected UAL before changes	29,299,522
(6) Change due to actuarial assumptions/methods	0
(7) Change from revised benefits	0
(8) Expected UAL after changes	29,299,522
(9) Actual UAL at end of year	30,866,247
(10) Gain (loss): (8) - (9)	(1,566,725)

* *Unfunded accrued liability.*

1. Total Annual Benefit Payments for Prior Year Pre-7/2001 Retirees	3,641,031	3,641,031	3,547,144
2. Maximum Total Annual Distribution: (J.1. / 12)	303,419	303,419	295,595

* *The maximum fund balance is 15 times the prior year's average monthly gross benefit distributions.*

COMMENTS AND CONCLUSION

Comment 1: Contribution requirements increased from the prior year, from \$2,585,170 to \$2,822,883. Increases were primarily due to increases in the active population, fewer retiree deaths from the retiree population than expected, fewer terminations from the active population than expected and increased liabilities due to service purchases.

Comment 2: The market value rate of investment return on System assets for the year ending June 30, 2013 14.48% was above the long term assumed level of 7.0%. However, under the asset valuation method, only a portion of investment gains and losses are recognized in any one year. As a result, the rate of return recognized in this valuation was lower than 14.48% and differences between the market value of assets and funding value of assets will be recognized in future years.

Conclusion: The City's contribution to the City of Dearborn Heights Police and Fire Retirement System for the fiscal year beginning July 1, 2014 has been computed to be \$2,822,883.

SECTION B
SUMMARY OF BENEFIT PROVISIONS
AND VALUATION DATA

SUMMARY OF BENEFIT PROVISIONS EVALUATED OR CONSIDERED AS OF JUNE 30, 2014

Service Retirement

Eligibility:

Police: 25 years of service and age 50 (prior to age 50 with City approval). Effective July 1, 2009, 25 years of service.

Police Command: 25 years of service and age 50 (prior to age 50 with City approval). Effective July 1, 2009, 25 years of service.

Fire: 25 years of service and age 50 (prior to age 50 with City approval). Age 55 with 20 years of service.

Benefit Amount:

Police: 2.8% of AFC for first 25 years of service, plus 5% of AFC at 25 years of service, plus 1% of AFC for years of service in excess of 25.

Police Command: 2.8% of AFC for first 25 years of service, plus 5% of AFC at 25 years of service, plus 1.5% of AFC for years of service in excess of 25 (but not more than 30) with a maximum benefit of 82.5% of AFC.

Fire: 2.8% of AFC for first 25 years of service, plus 5% of AFC at 25 years of service, plus 1.5% of AFC for years of service in excess of 25 (but not more than 30) with a maximum benefit of 82.5% of AFC.

Compulsory Retirement

Age 65 or, if requested by the City, age 60.

Average Final Compensation (AFC)

Police: The average of five years of highest compensation in the last 10 years of service. Effective July 1, 2004, the average of three years of highest compensation in the last 10 years of service. Effective July 1, 2009, the average of three years of highest compensation in all of the years of service.

Police Command: Effective July 1, 2005, the average of three years of highest compensation in the last 10 years of service. Effective July 1, 2009, the average of three years of highest compensation in all of the years of service.

Fire: The average of three years of highest compensation in the last 10 years of service. Effective July 1, 2011, the average of three years of highest compensation in all of the years of service.

For Police and Police Command: AFC may include up to 75 unused sick days in lieu of a lump sum distribution. Effective July 1, 2009, AFC may include up to 125 unused sick days, up to 240 hours of compensatory time, and up to 244 hours of vacation time in lieu of a lump sum distribution. For those hired on or after July 1, 2011, no sick time, compensatory time, or vacation time may be included in AFC.

For Fire: AFC may include up to 25 twenty-four (24) hour unused sick days in lieu of a lump sum distribution. For those hired on or after July 1, 2011, AFC may include up to 240 hours of sick time, compensatory time, or vacation time.

SUMMARY OF BENEFIT PROVISIONS EVALUATED OR CONSIDERED AS OF JUNE 30, 2014

Normal Form of Payment

Accrued Normal Retirement Benefit payable for life, with 60% continuing to the eligible spouse upon death of participant. Alternatively, member may elect an actuarially equivalent 100% or 50% survivor benefit.

Vesting

Eligibility:

Termination of employment with 10 or more years of credited service.

Annual Benefit:

Accrued Normal Retirement benefit at date of termination payable upon application on or after the date the member would have been eligible to retire had employment continued.

Duty Disability Retirement

Eligibility:

No minimum service requirement.

Annual Benefit:

Prior to age 55, benefit is 50% of AFC.

On or after attainment of age 55, Accrued Normal Retirement Benefit is payable based on years of service including credit for the period of receipt of a disability pension.

Non-Duty Disability Retirement

Eligibility:

5 years of service.

Annual Benefit:

Accrued Normal Retirement Benefit if disability occurs after age 55. Otherwise, 1% of AFC times years of service prior to age 55, increasing to 2% of AFC times years of service at disability date upon attainment of age 55.

Pre-Retirement Duty Death Benefit

Eligibility:

No minimum service requirement.

Annual Benefit:

An amount equal to that paid under the provisions of the Workers' Compensation Act payable to the spouse, children and/or dependents. This benefit continues during the lifetime of these recipients until the remarriage of the spouse, the attainment of age 18 of a child (or marriage, if earlier), or for as long as the Board determines the need exists in the case of other dependents.

SUMMARY OF BENEFIT PROVISIONS EVALUATED OR CONSIDERED AS OF JUNE 30, 2014

Pre-Retirement Non-Duty Death Benefit

A member with 25 or more years of service may name a beneficiary to receive the 100% survivor benefit which would have been payable had the member retired the day before death.

If a member dies with at least 15 years of service and has not elected an option, the surviving spouse receives the benefit the member would have received had the member retired the day before death, elected the 100% option and nominated the spouse as beneficiary.

If a member with less than 15 years of service dies, salary deductions with interest (not to exceed 2% per annum) will be paid to the designated beneficiary, if any, or to the estate.

Annuity Withdrawal

Fire, Police and Police Command may, at retirement, elect to receive a partial or total refund of the member's total contributions (without interest). If such refund is elected, the member's retirement allowance is reduced actuarially using factors based upon the GA83 Male Mortality Table and interest equal to the PBGC interest rate in effect on July 1, or on last preceding the retirement date.

Workers' Compensation Offset

Any benefits payable from the retirement system may be reduced for benefits paid under the Workers' Compensation Act.

Member Contributions

Police – 5% of salary.

Police Command – 3% of salary.

Fire – 5% of salary, effective August 1, 2007.

Deferred Retirement Option Plan (DROP)

Eligibility – Effective January 11, 2007 for Police Officers and August 21, 2007 for Firefighters:
Eligible for Normal Retirement or 25 years of service.

Benefit – 100% of the member's accrued benefit at the date of DROP is deposited into an account that receives 5% compound interest annually while the member remains an active member. No member contributions are made while in the DROP and no additional retirement benefits are earned. Employer contributions will include payroll of DROP participants and are not credited to members' accounts. Members may remain in the DROP for a maximum of 60 months (Effective July 1, 2009, 84 months for Police and Police Command) at which time they begin receiving the benefit accrued to the date of DROP into the program and elect an option of distribution of the DROP account (full lump sum, partial lump sum, rollover, lifetime annuity, leave funds in system).

After an employee attains thirty years of service, the allowed DROP participation period will be reduced by one month for every month beyond 30 years of service.

POLICE AND FIRE ACTIVE MEMBERS AS OF JULY 1, 2013
BY ATTAINED AGE AND YEARS OF SERVICE

Attained Age	Years of Service on Valuation Date						Totals

Average Age at Retirement: 48.2 years
 Average Age as of July 1, 2014: 66.8 years

SECTION C
ASSUMPTIONS AND METHODS

ACTUARIAL ASSUMPTIONS

The rate of investment return (net of expenses) used was 7.0% per year, compounded annually. This assumption is used to discount the value of future payments.

The rates of salary increase used are in accordance with the following table.

This assumption is used to project a member's current salary over his or her future working lifetime.

Sample Ages	Base (Economic)	Merit and Longevity	Annual Rate of Salary Increase
20	3.50 %	1.00 %	4.50 %
25	3.50	1.00	4.50
30	3.50	1.00	4.50
35	3.50	0.75	4.25
40	3.50	0.50	4.00
45	3.50	0.25	3.75
50	3.50	0.00	3.50
55	3.50	0.00	3.50
60	3.50	0.00	3.50

ACTUARIAL ASSUMPTIONS

The mortality table used was the RP-2000 Healthy Life Mortality Table for males and females, set forward 1 year for men, adjusted for mortality improvements to 2020.

Sample Ages	Actuarial Present Value of \$1 Monthly for Life		Future Life Expectancy (Years)	
	Men	Women	Men	Women
50	\$151.07	\$154.61	31.81	34.63
55	142.18	146.80	27.11	29.88
60	131.07	137.08	22.58	25.31
65	117.93	125.53	18.35	21.02
70	102.88	112.39	14.46	17.06
75	85.61	97.66	10.91	13.47
80	67.54	81.35	7.86	10.23

The mortality assumption is used to measure the probabilities of members dying before retirement and the probabilities of each pension payment being made after retirement.

ACTUARIAL ASSUMPTIONS

The rates of retirement are used to measure the probability of eligible members retiring during a given year and are shown below.

In the first year that an individual is eligible to participate in the DROP, 90% of such members were assumed to elect the DROP and 10% are assumed to retire (not elect the DROP). Following DROP election and participation, members are assumed to retire from active employment and commence benefits with the following probabilities:

<u>Retirement Eligibility</u>	<u>Police and Police Command</u>	<u>Fire</u>
1st year eligible	15 %	10 %
2nd year eligible	10	5
3rd year eligible	10	5
4th year eligible	10	5
5th year eligible	50	100
6th year eligible	75	100
7th year eligible	100	100

ACTUARIAL ASSUMPTIONS

Rates of separation from active membership are used to measure the probabilities of members remaining in employment. These rates do not apply to members eligible to retire and do not include separation on account of death or disability.

Sample Ages	Percent of Active Members Separating within the Next Year	
	Male	Female
20	14.9 %	24.9 %
25	9.9	14.9
30	6.9	9.9
35	4.9	6.9
40	2.8	4.9
45	1.6	2.8
50	0.4	1.6
55	0.0	0.4
60	0.0	0.0
65	0.0	0.0

Sample rates of becoming disabled are as follows:

Sample Ages	Percent of Active Members Becoming Disabled within the Next Year	
	Male	Female
25	0.17 %	0.12 %
30	0.22	0.21
35	0.30	0.31
40	0.44	0.46
45	0.66	0.68
50	1.09	1.11
55	1.88	1.80
60	2.72	1.90

ACTUARIAL COST METHOD

An actuarial cost method is a procedure for allocating the actuarial present value of pension plan benefits to time periods. The method used for this valuation is known as the individual entry-age actuarial cost method and has the following characteristics.

- (i) The annual normal costs for each individual active member, payable from the date of employment to the date of retirement, are sufficient to accumulate to the value of the member's pension at time of retirement.
- (ii) Each annual normal cost is a constant percentage of the member's year by year projected compensation.

The entry-age actuarial cost method allocates the actuarial present value of each member's projected benefits on a level basis over the member's compensation between the entry age of the member and the assumed exit ages.

The portion of the actuarial present value allocated to the valuation year is called the normal cost. The portion of the actuarial present value not provided for by the actuarial present value of future normal costs is called the actuarial accrued liability. Deducting accrued assets from the actuarial accrued liability determines the unfunded actuarial accrued liability.

ASSET VALUATION METHOD

Valuation Assets used for funding purposes is derived as follows: prior year valuation assets are increased by contribution and expected investment income and reduced by refunds, benefit payments and expenses. To this amount is added 20% of the difference between expected and actual investment income for each of the previous five years.

MISCELLANEOUS AND TECHNICAL ASSUMPTIONS

Marriage Assumption:	90% of participants are assumed to be married for purposes of death benefits. In each case the male was assumed to be 3 years older than the female.
Pay Increase Timing:	Beginning of year.
Decrement Timing:	Beginning of year.
Eligibility Testing:	Eligibility for benefits is determined based upon the age of nearest birthday and service nearest whole year on the date the decrement is assumed to occur.
Benefit Service:	Exact fractional service is used to determine the amount of the benefit payable.
Active Member Group Size:	The number of active members was assumed to remain constant.
Adjustments:	Age and Service Retirement Present Values were adjusted by 5% to account for the additional amount included in the AFC due to unused sick time for all groups and an additional 5% for uniform allowance, compensatory time and vacation time for Police Patrol and Police Command groups.

SUMMARY OF ACTUARIAL METHODS AND ASSUMPTIONS

Valuation Date	July 1, 2014
Actuarial Cost Method	Individual Entry Age
Amortization Method	Level Percent of Pay, 21 years, Closed
Asset Valuation Method	Market value with 5-year smoothing of gains and losses
Principal Actuarial Assumptions:	
Net Investment Return	7.0%
Projected Salary Increases	3.5% to 4.5%
Payroll growth	3.5%
Cost-of-living adjustments	Provided through Bonus Fund

March 4, 2014

Mr. John J. Riley II
City Treasurer
City of Dearborn Heights
6045 Fenton
Dearborn Heights, Michigan 48127

Dear Mr. Riley:

Enclosed are 20 copies of the July 1, 2014 actuarial valuation report. We look forward to meeting with you and the Retirement Board to discuss the valuation report.

If you have any questions, please call me.

Sincerely,

Mark Buis
